

PACE
Personalized AI Coaching Experience

You

Can you please briefly explain the basic principle of the Steelman method to me again?

Maria

With pleasure! The parties often talk past each other in a discussion and don't respond to each other. By Steelmaning, you give an opponent to the

Real skills instead of knowledge. Discover Masterplan PACE

Masterplan PACE is the **personal AI coach** that helps all employees effectively apply their acquired knowledge by adapting to their individual learning methods and skill levels.

Personalized Coaching

Create captivating learning experiences and unlock the potential of your employees.

For everyone in the company

Provide every department with the support of a personal coach on all devices, around the clock.

Effective learning transfer

Make sure that not only the training is completed, but also that the learned content is being applied effectively.

Experience training like never before This is how PACE works

- 1 Learners initiate a chat after selected lectures, and PACE adopts a role aligned with the course content, assigning a task from everyday work life.
- 2 An authentic conversation develops, and PACE follows up for details and evaluates answers, just like in real life.
- 3 Learners can receive immediate help and ask questions until the task is understood and solved.

Only 34%* of training activities result in learning transfer, which can be improved through practical application during training.

Masterplan PACE enables effective upskilling at scale for the whole company.

You can effortlessly transform training into personalized coaching with interactive AI training.

Customized, hands-on, and specific

Reflect together

"How much time do you spend in meetings?", "What do you find difficult when prioritizing?" - PACE helps you reflect on yourself and apply new techniques to prioritize effectively.

Apply in practice

Sometimes PACE acts as a negotiator or a persistent authority figure and engages learners in scenarios from everyday working life, rather than just asking questions.
